

I vehemently oppose HR 4026. I am a recent subscriber to XM Satellite radio and I enjoy it immensely. I have an appreciation for the variety of programs offered. Many of the programs, I cannot receive in any other market. Furthermore, the ability to have access to traffic and weather reports are additional benefits.

Benefits that I pay for. And because I pay for access, the National Association of Broadcasters have no right to dictate what I listen to.

Therefore I respectfully request, that NAB's petition 04-160 be resoundingly rejected. Thank-You.
